The aim of this course is to provide participants with a hands-on understanding of the design and use of common management control systems. This includes discussion of the planning and budgeting process, financial and non-financial performance measurement, and questions of target setting and performance evaluation. Participants learn about the usefulness of management control systems, but also about potential challenges and pitfalls.

**Management Control Systems - 25th - 26th June 2020**
- Planning, budgeting, and variance analysis
- Financial performance and value creation
- Performance measurement systems
