

Management Control Systems

The aim of this course is to provide participants with a hands-on understanding of the design and use of common management control systems. This includes discussion of the planning and budgeting process, financial and non-financial performance measurement, and questions of target setting and performance evaluation. Participants learn about the usefulness of management control systems, but also about potential challenges and pitfalls.

Management Control Systems - 9th - 10th June 2022

- Planning, budgeting, and variance analysis
- Financial performance and value creation
- Performance measurement systems
- Target setting and relative performance evaluation

Top speaker

- Prof. Dr. Martin Messner, University of Innsbruck

What our students said

- Inspiring and nice teacher
- I got a lot out of it to challenge this course in my own organization
- The Pre-Activity was very well integrated
